The next time you hear “diversity, equity, inclusion” and “anti-racism” from your human resources department or see your first grader’s schoolbook encouraging them to discover their real gender(s), instead of just thinking “That doesn’t make sense!” you will understand what you are facing and know how to respond.

We are living in occupied territory. With stealth, the Woke movement has taken nearly all our institutions and levers of power, in government and corporate America. By understanding the values and principles of the Woke we can better anticipate their actions, defend ourselves, and counter them. By understanding the five steps that gave rise to the movement (utopia promised, saviors anointed, power accumulated, propaganda unleashed, and scapegoats accused) we can thwart the “victim” versus “privileged oppressor” game of victim-identity-Marxism. Uniquely, this presentation shows how the Woke movement rests on four utopian promises: race utopia, sex utopia, safety utopia, and spiritual (anti-Christian) utopia: each with its victims and “privileged” scapegoats, and each a socio-political ally of the others.

Finally, exploring why our children and teenagers are so highly valued by utopian tyrants, it will be clear why the today’s battle lines are in our K-12 schools, public and private!

Armed with this knowledge, contacts for effective engagement, and with over a dozen specific ways to fight back now, you can fight the Woke ... and win!
